Narcan Availability

Opioid Response Programs (ORPs) across Alaska partner with DHHS, Office of Substance Misuse and Addiction Prevention (OSMAP) to distribute opioid overdose rescue kits to members of the general public and to professionals (e.g., first responders, agency/organization staff, etc.).

Distribution information is available for 4,822 kits, with the majority (95.2%) associated with rescue kits distributed to the general public.

Narcan Distribution by Region

*borough

A majority of individuals sought rescue kits out of concern for **others**.

Most people sought rescue kits for the **first time**.

Slightly more **females** than males sought rescue kits.

The **majority** of people were **25 to 39** years old.

ORPs: When people return for a rescue kit refill, please indicate what happened to their previous kit on the tracker. If the rescue kit was used in response to an opioid overdose, please encourage them to complete a report back survey available on the Project HOPE website.

Project HOPE is a State of Alaska program to reduce opioid-related deaths through training and Narcan distribution. For more information contact ProjectHOPE@alaska.gov or [link to Project HOPE website](#).
